

Reduce Waitlists. Reclaim Time. Reinvent ADHD Care.

Automate your ADHD pathway for faster, safer
and more effective assessment and treatment
with Zendra Navigator.

Transform your ADHD pathway

Auto Screening

Automatically screen out inappropriate referrals at assessment.

One Unified Touchpoint

No more scattered forms, emails, or paperwork for clinicians, parents, adults, and teachers. No more chasing forms.

Better Medication Monitoring

Streamline and make physical health monitoring safer, while automating the collection and scoring of rating scales from home and school.

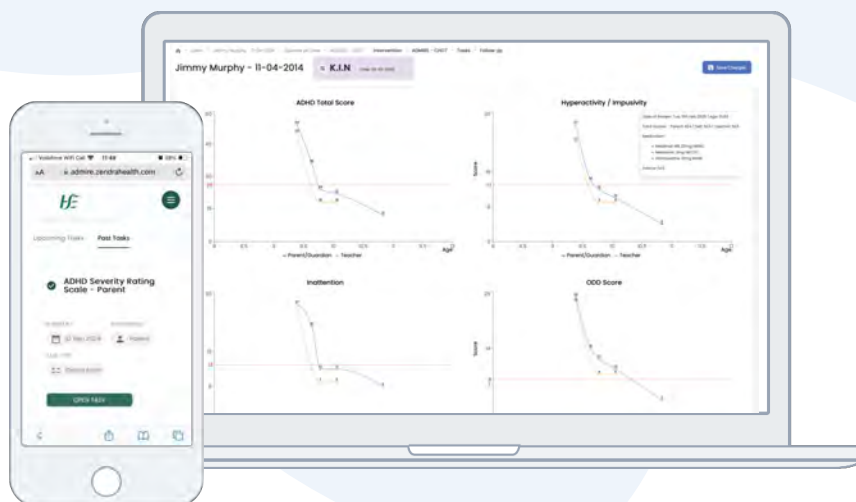

Science-backed

Based on evidence-based ADHD protocol developed by Trinity College Dublin that improves ADHD assessment and treatment.

Interoperable

Can operate standalone or with existing electronic health record systems.

Key Benefits for Clinicians

1

Reduce Waitlists

Cut waiting list by at least 33% through auto screening, automated assessments and streamlined workflows.

2

Reclaim Time

With streamlined physical health monitoring and auto-generation of ADHD assessment reports, prescriptions, GP letters and patient letters.

3

Reinvent ADHD care

Centralise care coordination with parents, teachers, and adults, while ensuring scalable adherence to clinical guidelines.

Evidence-Based. Co-Designed. Life-Changing.

Zendra Health is helping the Irish Health Service Executive (HSE) to transform the ADHD pathway for children and adolescents.

Co-designed with leading clinical and academic experts from the HSE ADMiRE ADHD specialist team, Trinity College Dublin, Zendra Health, as well as parents, teachers, and young people with ADHD, this solution is built on the evidence-based, validated and endorsed clinical pathway in ADMiRE.

The **ADMiRE protocol**, developed by Professor Jane McGrath Trinity College Dublin, is proven to be highly effective, improve outcomes and reduce risk.

Discover how we're transforming ADHD pathways.
