The **Challenge...**

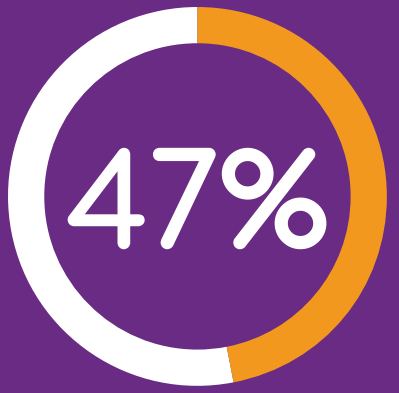

In the UK, obtaining assessments for autism and Attention Deficit Hyperactivity Disorder (ADHD) in children has become increasingly challenging due to long waiting times, insufficient specialist resources, and inconsistent regional services.

The NHS faces a surge in demand for neurodevelopmental assessments, resulting in significant backlogs where families may wait years for a diagnosis. Early diagnosis is essential for accessing support, as delays can negatively impact children's academic performance, social skills, and mental health.

Geographic disparities lead to unequal access, with some NHS trusts offering shorter waiting lists. Families often navigate a complex system with bureaucratic hurdles, and many resort to expensive private assessments, which may not always be recognised by schools.

This situation exacerbates inequalities, as only financially capable families can afford quicker diagnoses. The ongoing delays highlight the urgent need for increased funding and a more equitable system to ensure timely support for all children.

MyCareBridge

Bridging Care, **Connecting** Lives

By shifting from GP-based to education setting-based referrals, it empowers families by making them active participants in the process, connecting them with service providers, clinicians, and education settings, in a single platform.

It aims to reduce overall waiting times by improving efficiency, reducing administrative burdens, automating reminders, facilitating real-time communication, and collating the information for reporting to improve the overall experience for all stakeholders. Currently deployed to multiple NHS trusts, social enterprises and private use cases coming soon.

Empowers Parents

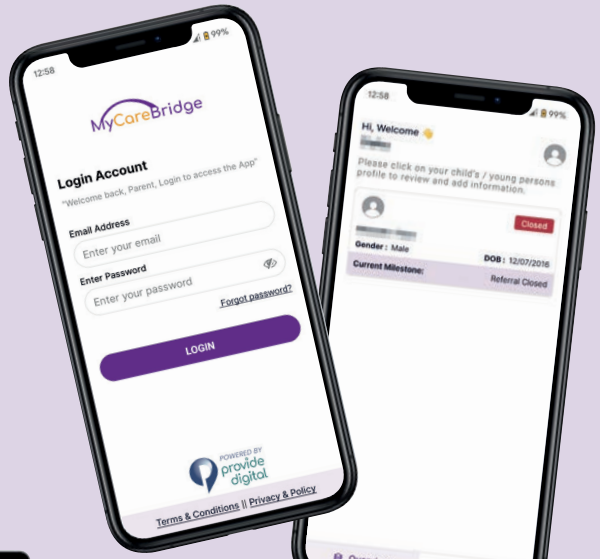

Makes parents central to the referral process, providing full transparency and the ability to track status, upload supplementary evidence, information, and follow up on actions.

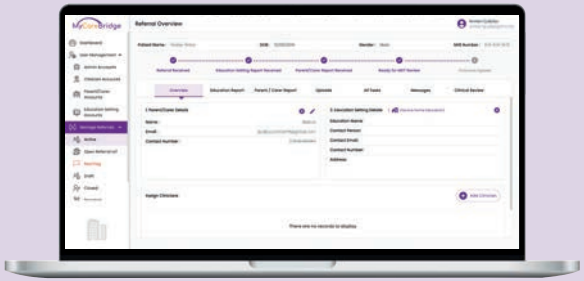

Improves Efficiency

Users can track referrals and monitor progress through the platform, ensuring timely access to care and reduce delays. System administrators can send messages or assign tasks to schools or parents in the portal to speed up process.

Accelerates Referrals

Provides end-to-end referral management, reduces time to gather information and complete referrals by connecting all stakeholders, automating reminders, and streamlining the process.

Enchance Communication

Offers a secure, single, unified portal system for all stakeholders including automated alerts and reminders to keep referrals moving and facilitate easier and timely communication.

Security and Compliance

The platform adheres to strict data security standards and Information Governance protocols, ensuring the protection of sensitive patient information. It is fully compliant with relevant regulations.

Modular and Scalable

Modular referral pathways allow organisations to set-up tailor-made processes. It supports multiple user types, including administrators, clinicians, school personnel, parents and carers, each with tailored access and capabilities.

Flexible Capabilities

Data can be structured in the format and order you require, you choose your referral processes to cater for your local needs, such as handling referrals particular GP surgeries and MyCareBridge will soon benefit from PDS integration.

Further Features

Task Assignments and Notifications

As referrals reach new stages and new tasks become available for all parties, relevant notifications and alerts are triggered. This allows the process to move as quickly as possible.

Easy Uploads

Documents and videos can be uploaded by schools or parents to assist clinicians in the assessment phase.

Personalised Dashboards

Parents and Educators will have unique dashboards to directly submit and monitor referrals.

Real-time Updates and Referral Tracking

All care stakeholders will have access to only relevant information and will be able to track at which stage of the assessment journey they are at. Any changes will be ready to view instantly.

Pricing Plans

We Offer a range of flexible pricing packages designed to meet the unique needs of your service, from small scale implementations to comprehensive, large-scale deployments; all to help you deliver better health outcomes more efficiently, accessibly and with greater reach.

	Small Organisations	Medium Organisations	Large Organisations
MyCareBridge	£20,000	£25,000	£35,000
Deployment	£5,000	£6,000	£10,000

Deployment fee includes:

- Guidance Materials
- Standard configuration and set up
- Comprehensive online training

Deployment cost featured above is based on our typical pathway and configuration. Any required changes or specialisations may result in an increased charge.

Development and Deployment

Successfully deployed across the Mid and South Essex Community Collaborative (MSECC), and we collaborate with customers to ensure a smooth deployment through personalised support and tailored solutions. Provide Digital is a specialist developer focused solely on healthcare solutions. Ongoing discussions aim to expand the platform's capabilities, integrate with healthcare systems, and explore AI enhancements for automation and process improvement.

Prefer a Personalised Pricing Plan?

We understand that each organisation may have its own specific requirements.

That's why we offer tailored pricing packages to fit your unique needs. Contact us for a personalised consultation, and we'll work with you to create a plan that maximises the impact of MyCareBridge for your organisation. For the latest offers and more information speak to a member of the team.

Large **discounts** available for ICS-wide or multi-organisation contracts, as well as multi-year contracts.
